Grouper ID Chart

Tiger Grouper

Note: Effective April 16, 2012, tiger grouper have been removed from the snapper grouper management complex and federal regulations are no longer in effect for this species.

Speckled Hind AKA: Kitty Mitchell, Strawberry Grouper

The common names of this grouper stem from the profusion of tiny white spots that cover the deep reddish-brown head, body and fins. In addition to the normal color pattern, some juveniles undergo a xanthic phase, where white spots cover a light yellow background.

Nassau Grouper
